# PREPARED TISSUE CULTURE

We custom formulate any recipe specific to your various growing stages.

## About

Dalynn Biologicals has been serving hospitals, laboratories and veterinary clinics around the world with culture media and microbiological supplies for over 30 years. We are now bringing our expertise in culture media, and offering prepared tissue culture media for micropropagation in the cannabis industry.

## Products

Mediums are provided in jars and tubes in various sizes with breathable lids. We are able to custom formulate any recipe specific to your plant strain and its growth stage. Sterility checks are performed on each lot of media produced.

## Services

We offer prepared media in sterile vessels for you to do your own micropropagation in your laboratory. We work with you to help you find the perfect medium for your specific strain of cannabis.
