

Vitamin K Hemin Enrichment (Liquids)

- For in vitro use only -

Catalogue No.

VV30-100 Vitamin K Hemin Enrichment (Liquids) [100-mL]
VV30-250 Vitamin K Hemin Enrichment (Liquids) [250-mL]

Active Ingredients per 100-mL Bottle

Vitamin K ₁	0.02-g
Hemin.....	0.1-g

Description

A stabilized solution of vitamin K and Hemin used as a growth enrichment for various anaerobic microorganisms to be used in solid culture media containing agar. Vitamin K has shown to enhance growth of many anaerobes including *Bacteroides* species and certain gram-positive nonsporeformers; Gibbons and MacDonald also reported the isolation of strains of *Prevotella melaninogenica* that required both hemin and vitamin K for growth.

Procedure

For each liter (L) of liquid media prepared add 5-mL of the Vitamin K Hemin Enrichment prior to autoclaving.
